- **Other:** WebSocket, Stripe Integration, Real-time Apps, Error Handling

PROFESSIONAL SUMMARY

MERN and Next.js full-stack developer with expertise in building scalable web applications. Skilled in Node.js, React, Express, MongoDB, and modern frontend frameworks. Experienced in backend API development, real-time chat applications, e-commerce solutions, and cloud deployment using AWS. Strong problem-solving skills, multi-lingual communication, and a proven ability to manage projects from concept to deployment. Seeking a challenging role to contribute technical expertise and grow professionally.

PROFESSIONAL PROJECTS

MERN Stack Projects:

Group Chat Application

- Admin can manage chatrooms, block/remove users, and delete messages.
- Users can join/leave rooms, update profiles, and send media messages stored in AWS S3

WhatsApp Web Clone

- JWT-based authentication and multi-device login.
- Supports audio, video, text, file messages, reactions, message forwarding, and deletion.
- Real-time notifications and user management features (block/unblock, account removal).

E-commerce Website

- JWT authentication, user roles, protected APIs.
- Admin and client dashboards, Stripe payment integration, CAPTCHA protection.
- Built with Redux Toolkit and RTK Query, including responsive UI.

Facebook Clone

- Real-time posts, comments, chat, and notifications.
- Users can follow/unfollow and interact via nested comments.

Next.js Projects:

E-commerce Website (TypeScript + GraphQL)

- Next-Auth authentication, Prisma schema setup with PostgreSQL.
- Role-based protected routes, admin & client dashboards.
- Stripe payment integration, email notifications, infinite scroll shop page, responsive UI/UX with Tailwind CSS.
